on the environment...

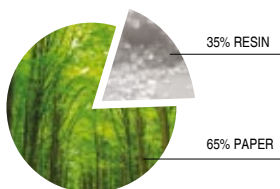

POLYREY has an active policy to reduce its carbon footprint and its impact on the environment across all stages of the manufacturing process and life cycle of its products.

POLYREY offers on request:

- Life Cycle Analysis (LCA)
- Environmental and Health Declaration Sheet (FDES)

The manufacturing process has been improved with respect to environmental protection:

- Water consumption reduced by 90%
- Energy consumption reduced by 40%
- Waste recycling increased to 75%

Polyrey HPL is an eco-certified product, its primary component is paper (65%), a renewable resource that comes from sustainably and responsibly managed forests.

All Polyrey panels are PEFC* certified

Polyrey has PEFC certification for its two production sites which covers all panels manufactured by Polyrey. The PEFC-certified chain of custody guarantees that the wood and raw materials used in our products come from sustainably managed forests.

*All of our HPL and Compact Solid Grade Laminate contain a minimum of 40% PEFC-certified material. All of our Panoprey products contain a minimum of 90% PEFC-certified material.

Large selection of FSC-certified HPL decors

Polyrey has also put in place an FSC-certified chain of custody for its HPL, covering the majority of decors. FSC-certified chain of custody confirms that the wood used in our products comes from sustainably managed forests.

Sanitized Antibacterial Grade

Polyrey is constantly innovating to provide its clients with healthy decorative solutions, such as its antibacterial silver-ion core treatment, where silver ions (Ag+) are encapsulated in glass beads, resulting in an inorganic binder solution which does not migrate, remains very stable and does not deteriorate over time. The antibacterial action of silver is an essential property in the health and food service industries and public spaces.

All Polyrey interior HPL and Compact laminates undergo an antibacterial silver-ion core treatment, to ensure they remain healthy for a very long time.

Safeguard™ Plus Anti-Bacterial laminates retard the growth of nearly 99% of common form of bacteria on any decorative surface. Greenlam Safeguard Plus laminate surface is produced by permanently incorporating high efficiency Anti Microbial Agents, us-epa approved, during the manufacturing process. Surfaces certified with this symbol are highly recommended for places where health and safety are critical.
