

SOLID COLOUR

HPL SOLID COLOUR

...SEAMLESS & CHEMICAL RESISTANT

SOLIDCOLOUR consists of several layers of melamine resin impregnated papers that **offers the same colour through both the surface and the core** delivering a seamless aesthetic look.

Technically unique, HPL **SOLID**COLOUR is also a harder product with **UV AND CHEMICAL RESISTANT PROPERTIES.**

SOLID COLOUR

HPL SOLID COLOUR

...SEAMLESS & CHEMICAL RESISTANT

SOLIDCOLOUR is an attractive surface finish, possessing the high-performance of the DUROPAL HPL products. Both, the decorative surface and product core consist of several layers of melamine resin impregnated papers.

SOLIDCOLOUR provides an easy fabrication and is suitable for panels and edging applications. Due to specially developed compositions, the solid dyed core has excellent processing properties and can be worked by any fabricator with traditional woodworking equipment.

SOLIDCOLOUR delivers a homogenous coloured material to design visually pleasing work pieces.

All colours are available in satin matt finish (SM) and Icy White is also available in high gloss finish (HG).

APPLICATIONS

- Furniture and interior fittings
- Shop fittings
- Sanitary facilities in commercial spaces
