

URBAN

RECONSTITUTED VENEERS

- FSC® Certified
- Rated E0
- 13 decors

URBAN offer a range of reconstituted timber species to create a beautiful and practical product with less impact on our forests.

URBAN is manufactured using enhanced dyes that protects the surface against UV rays and all decors are FSC® certified and rated E0.

Just like other dyed products, such as fabric, it is possible that URBAN RECONSTITUTED VENEERS may vary slightly in colour from batch to batch between 5-10%.

To ensure the best results, we recommend you order all veneers for your project at the same time and use the same coating process when required.

Just as natural timber veneers will tend to change colour in the presence of light, URBAN may also be affected. This is a result of a natural process and not a defect in the veneers chosen.

We strongly recommend that when veneer is exposed to strong light sources and sunlight, particularly in a project with north facing windows, to install blinds or have UV protective film applied. You may use a non yellowing acrylic urethane such as Mirotone Sunshield Clear PU5577 to help minimise colour changes over time.
